

Low Aspect

Low-Aspect sails have a longer foot length, with the load spread more evenly into the sail. This type of sail also requires fabrics that are designed and woven to the highest standards. A key performance feature for the **Low-Aspect** range is the ability to provide a good balance between the fill and the bias strength. To achieve this, Contender reduces the size of the fill yarns, making them bend slightly over the warp yarns during weaving. This creates the right balance between outright fill strength and bias stability, ensuring smooth and even distribution of the loads throughout the sail.

Product Specifications	
Style	Construction
4.46 oz. Ripstop	150 x 250
5.46 oz.	150 x 220
6.46 oz.	180 x 440
7.46 oz.	220 x 440
8.46 oz.	350 x 570
9.46 oz.	350 x 750
10.46 oz.	350 x 1000
12.46 oz.	750 x 1000
15.46 oz.	1000 x 1000
